5	Settlement Tables and Maps.....	8

1 Purpose of this report

- 1.1 This report contains the findings of the Annual Housing Monitor (HM) for the survey year 1/4/2024 to 31/3/2025. It also provides information on the background to and the methodology involved in undertaking the HM.
- 1.2 It sets out:
 - the background and purpose to undertaking the HM;
 - the methodology involved in carrying out the HM;
 - a summary of results of the 2025 HM; and
 - the site information and maps for each settlement in the Borough.

2 Background

- 2.1 The Planning Act(Northern Ireland) 2011 Section 3 sets out the requirement for the Council to undertake a survey of the land for the Borough and keep under review the matters which may be expected to affect the development of its district or the planning of that development. Those matters include the principal purposes for which land is used in the district. In addition, The Planning (Local Development Plan) Regulations (NI) 2015 (LDP Regs) (Part 6), require the Council to produce an Annual Monitoring Report, once the plan is adopted, and it must specify, amongst other things, the supply of land for housing and the number of net additional units built.
- 2.2 Although it is not a legislative requirement to monitor housing land until the Council's new LDP is adopted, the Council considers it good practice to monitor in advance to keep its evidence base under review and to gain an understanding of the amount of new houses completed each year and the level of housing land supply remaining available within the settlements of the Borough.
- 2.3 One of the main functions of the LDP is to ensure an adequate and continuous supply of housing land. This can be achieved by ensuring that LDPs identify an acceptable amount and choice of sites, which are suitable for house building.
- 2.4 Consequently a HM is undertaken to:
 - monitor progress of housing development in respect of the provisions of the Regional Development Strategy 2035;
 - monitor progress of housing development in accordance with the provisions of the Antrim Area Plan 1984-2001 and its alterations and the Belfast Metropolitan Area Plan version as published in 2014;
 - inform the preparation of a new LDP in regard to required provisions for housing; and
 - generally make available information to the public and the development industry on the remaining potential for further housing.

- 2.5 To maintain this evidence base, Planning Section keeps records of all housing approvals and zoned housing land within settlements and each year a survey is undertaken to ascertain the amount of housing that has been built on each site in the previous year.

3 Methodology

- 3.1 The survey covers all settlements as defined in the legacy Development Plans. It should be noted that it excludes the numbers of houses approved and completed outside of settlements in the countryside. Sites which are monitored include:
- all approvals (Outline, Full and Reserved Matters) for housing on un-zoned land (whether extant or expired approvals);
 - all housing zonings (with or without planning approvals); and
 - all housing approved through the planning appeals process.
- 3.2 The HM thus includes all areas identified as potentially suitable for residential development in current development plans and any other area within settlements which has been granted planning permission for residential development and where circumstances have not changed such that the potential for this development no longer exists. A previously monitored site will be removed from the HM where any non-residential development commences on it.
- 3.3 The HM records net housing gain, as opposed to the gross total housing on sites, whereby housing is lost to make way for the new housing. For example redevelopment of a site that contained 1 dwelling for 10 apartments, is recorded as a gain of 9 dwelling units.
- 3.4 In order to determine the amount of housing completions and commencements on each site, the Council's building control information in the form of housing completion and commencement certificates are applied to each site.
- 3.5 In the survey, the number of dwellings built on each of the monitored sites and the total area developed at the time of survey is recorded. The area remaining and residual available dwelling potential is calculated for each site. Figures are then compiled for each settlement and ultimately on a Borough wide basis.
- 3.6 Following the transfer of planning powers to the Council in April 2015, the Planning Section has been working closely with Building Control colleagues to ensure that the information provided is as accurate as possible. This is an ongoing process and refinements to the methodology involved in future HMs will potentially mean that variations may occur in the figures for individual sites from year to year. However this is unlikely to be significant within the overall housing land context of the Borough.

- 3.7 It is also acknowledged that there may be a 'lag' period, between a dwelling appearing to be complete on the ground and the issuing of a building control completion certificate. Consequently on some sites, it may appear that more dwellings are 'complete' than are reflected in the figures for that site. It is the position of this Council that the use of building control completion and commencement information is the most appropriate mechanism to assess the status of each monitored site.
- 3.8 The summary results for the HM for 2025 for each settlement in the Borough are set out in the Table overleaf, followed by the associated Maps and Tables in alphabetical order, detailing the situation within each settlement.
- 3.9 Please note only those sites 'completed' in the 2025 survey year are shown on the Maps and Tables, with sites 'completed' in previous years having been removed for presentational purposes.
- 3.10 References on the maps to 'urban footprints', are defined as the continuous built up area of the settlement. The urban footprint contains land which has a formal urban use including land on the edge of the settlement where it forms part of the curtilage of a building. Undeveloped zoned land at the edge of the settlement will be excluded. Urban footprints have been identified and set as a baseline as of January 2001. Land outside of the urban footprint is termed greenfield.
