

CODE OF GOVERNANCE

Introduction

Governance is about how local government bodies ensure that they are doing the right things, in the right way, for the right people, in a timely, inclusive, open, honest and accountable manner.

It comprises the systems and processes, and the cultures and values, by which local government bodies are directed and controlled and through which they account to, engage with and, where appropriate, lead their communities.

In 2016 CIPFA and SOLACE issued a revised framework developed by the CIPFA/SOLACE Joint Working Group on Good Governance in Local Government building on the *International Framework: Good Governance in the Public Sector (CIPFA/IFAC 2014)*. This sets the standard for local authority governance.

The **Delivering Good Governance in Local Government: Framework (April 2016)** positions the attainment of sustainable economic, societal and environmental outcomes as a key focus of governance processes and structures. It emphasises the importance of considering the longer term and the links between governance and public financial management.

The Approach

The Council is responsible for ensuring that its business is conducted in accordance with the law and proper standards, that public money is safeguarded and property accounted for, and is used economically, efficiently and effectively.

Antrim and Newtownabbey Borough Council have adopted the Local Government Framework in line with good practice, including the principles that underpin it. The Council has developed a Code of Governance to demonstrate that their governance structures are consistent with the core and supporting principles contained in the Local Government Framework.

Each year Council conducts a review of the effectiveness of its System of Internal Control and governance arrangements to ensure compliance with the Code of Governance. This review informs the production, review and approval of the Annual Governance Statement.

Principles of Good Governance

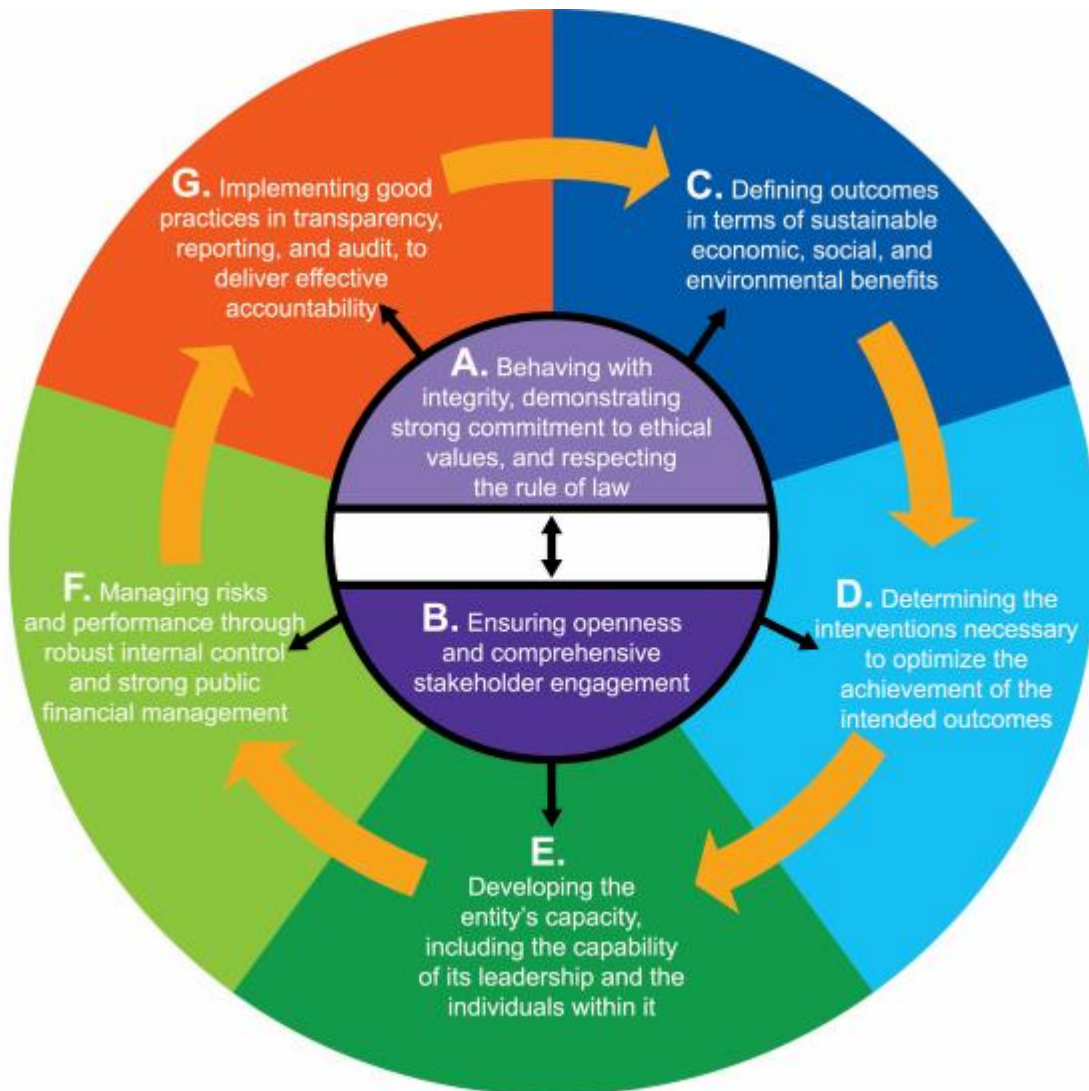

The *International Framework: Good Governance in the Public Sector*, (CIPFA/IFAC, 2014) defines governance as:

“Governance comprises the arrangements put in place to ensure that the intended outcomes for stakeholders are defined and achieved.

To deliver good governance in the public sector, both governing bodies and individuals working for public sector entities must try to achieve their entity's objectives while acting in the public interest at all times.

Acting in the public interest implies primary consideration of the benefits of society, which should result in positive outcomes for service users and other stakeholders.”

The diagram below illustrates how the various principles for good governance in the public sector relate to each other. The seven core principles each contain a set of supporting principles, which in turn have a range of specific requirements that apply across Council business and these are described in detail on the following pages.

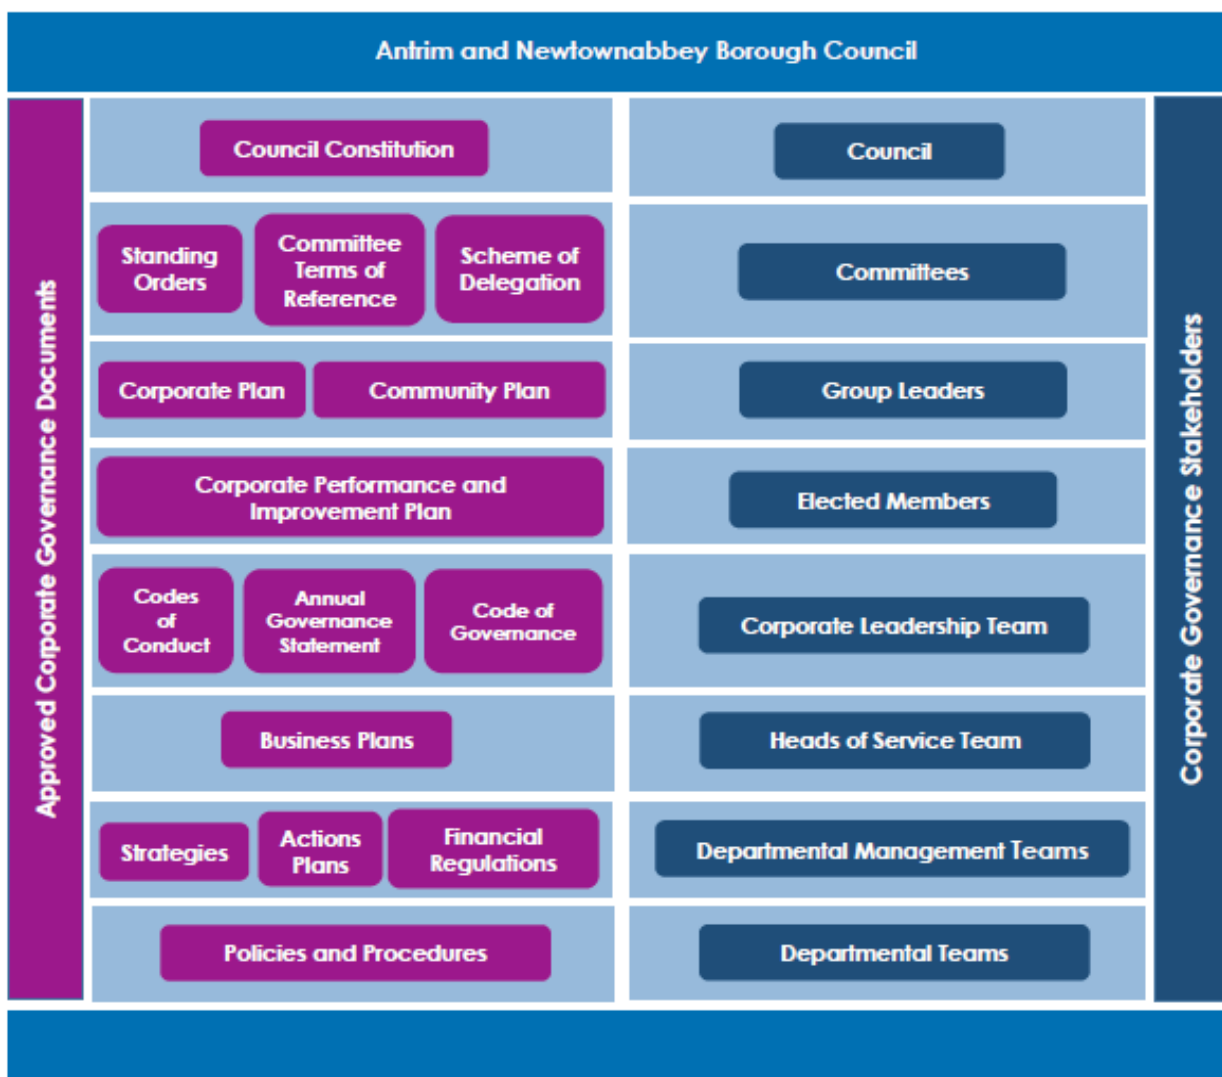

The Council's Code of Governance is based on the seven core principles set out in the CIPFA/SOLACE Framework (2016 edition). How we meet these seven core principles is reviewed and updated annually.

Compliance with the Code

A summary of the key elements of Council's Governance Framework are depicted in the diagram below. They have been split into Approved Published Documents and Corporate Stakeholders, with the aggregation of these forming the governance of Council

The following Code of Governance Schedule provides details of Council's own systems, processes and documentation to demonstrate compliance.
