## **Introduction**

Antrim and Newtownabbey Borough Council has a population of 138,000 people, covering an area of 274 sq. miles from the shores of Lough Neagh in the west to the shores of Belfast Lough in the East and from its northern boundary with Ballymena, the Glens of Antrim and the Port of Larne to its southern borders with Belfast and Lisburn.

The Borough is a prime business location with large international manufacturing companies sitting comfortably alongside small and medium sized businesses. There are two popular and modern retail outlets, Junction One and Abbey Centre, offering a friendly local shopping experience for residents and visitors.

The borough also offers three higher education facilities, six top class recreation facilities, three theatres and two hospitals within the area.

## **Purpose of the Retention and Disposal Schedule**

This document sets out the minimum time periods for which the various records created by the Council should be retained, either due to their ongoing administrative value or as a result of statutory requirements. It will enable the Council to dispose of records promptly when they cease to be of any continuing administrative/legal value and will identify records which should be transferred to the Public Record Office of Northern Ireland (PRONI) because of their long-term historical/research value.

The schedule complies with the requirements in the Public Records Act (NI) 1923 and the Disposal of Documents Order (S.R. & O. 1925 No 167).

## **What is covered by this retention and disposal schedule?**

This schedule identifies the retention and disposal arrangements for all records created by the Council. A record is recorded information, in any form, created or received by the Council or individual members of staff to support and show evidence of Council activities. For the purpose of the Council's Records Management Policy, records are defined as:

*“Recorded information, in any form, created or received and maintained by an organisation or person in the transaction of business or conduct of affairs and kept as evidence”*

Within the Council a range of information/documents exists but which does not need to be captured into the formal records management system. This information (e.g. ephemeral material, reference material, and convenience copy) is not covered by the retention and disposal schedule and includes:

- Rough or early drafts where these do not contain evidence of policy development;
- Circulated copies of drafts; unaltered drafts;
- Convenience copies or information retained for reference purposes only (it is not retained to provide evidence of transactions, but only for its informational value);
- Reference or published materials from external sources which are not needed for record purposes, e.g. papers from conferences and seminars, policy briefings, sales catalogues, brochures, “junk-mail”;
- cc'd emails;
- Emails that are not the primary record of decisions or transactions (e.g. the information is recorded in some other way following the email exchange);
- Personal records and emails, e.g. social arrangements, personal copies of performance reviews;
- Stocks of publications that have been superseded;
- Bookings for internal services (e.g. rooms, equipment) where no charges are made;
- Notes taken during meetings where formal notes/minutes have been prepared;
- Meeting requests, acceptances and apologies;

- Corporate notices and circulars (circulated copies, i.e. not the original);
- Superseded circulation/contact lists;
- Covering/transmission documents such as covering letters, fax cover sheets, compliments slips or emails accompanying attachments that do not provide additional information to the main document and where evidence of date and time of receipt or despatch are not required;
- Reservations and confirmations of arrangements with third parties, such as joining instructions for conferences, training, etc. when invoices have been received.
- Personal data and information sent to the Council which is not relevant or connected to the Council's functions or that particular file.

These categories of information should be destroyed as soon as reference to the information has ceased. Unnecessary retention of such information represents a resource burden for the Council in terms of storage costs, administration and freedom of information and data protection obligations.

In almost all cases, the disposal periods given in the schedule relate to master copies of records which form the official version retained for regulatory or business reasons. Where it is clear that a master copy is being retained elsewhere within the Council there is no requirement to keep other copies. In all cases, copies of records should not be retained any longer than the period stated for the master copy in the retention and disposal schedule.

Where the documents could be pertinent to a future claim eg cleaning schedules, rotas, consent forms, a copy should be attached to the incident report form and sent to the appropriate business area. The original can then be destroyed in accordance with the Retention and Disposal Schedule, and the copy retained in with the investigation file for the required period.

## **Electronic Documents/Material**

The principles governing the retention of electronic documents are the same as those for paper records. In support of these principles, it is important that electronic folders should be organised in a similar way as paper records. In addition, ephemeral electronic documents of no enduring value, such as those of purely personal relevance, should be deleted from the system at the earliest opportunity.

In business areas where the Council operates a print to paper policy the electronic documents which form part of the official record should be printed out and placed on the appropriate file.

## **Email**

Emails may form part of the Council's corporate record and, therefore, are subject to its records management policies and procedures. All staff, therefore, should review incoming and outgoing emails to decide whether the information they contain should be retained as part of the corporate record. In business areas where the Council operates a print to paper policy the email which form part of the official record should be printed out and placed on the appropriate file. The email should then be deleted from the personal mailbox and any "deleted items" box.

Where a member of staff wishes to keep an email message for administrative or reference purposes, it should be moved into a relevant area. These messages should be deleted when they have ceased to be of use for reference purposes. Ephemeral email messages, which are not required for either administrative or reference purposes, should be deleted immediately.

Incoming and outgoing emails are potentially covered by the Data Protection Act if one or other of the following criteria is met:

- The sender or recipient is identifiable, either through their email address or the text of the email; or
- The text of the email contains personal data, i.e. facts, opinions or intentions about identifiable living individuals.

The Data Protection Act specifically requires that personal data should not be kept for longer than necessary. Any emails containing personal information should therefore be deleted as soon as they are no longer of administrative value, and in compliance with this Schedule.

## **Categories of Retention / Disposal**

There are five broad categories of retention / disposal:

### **1. Determined on Review**

These are records requiring appraisal. They are appraised by Council staff at specified periods to determine if there is a continuing business need for retention and by PRONI staff to determine if they are required for historical or research purposes.

### **2. Permanent Retention by the Council**

The records are permanently retained in the Department for administrative or legislative purposes and will be physically or digitally managed in an accessible format within record keeping systems.

### **3. Transfer to Lead Government/Funding Agency**

Records that will be transferred back to the lead government body or funding agency at the end of the period, generally records relating to funded projects.

### **4. PRONI Appraisal**

The long term historical and evidential value of the records cannot be confirmed and therefore requires appraisal by PRONI. If it is deemed that there is no long term value, the records can be destroyed; otherwise they are transferred to PRONI, in line with policies and procedures.

A file may be reviewed a number of times:

#### **On Closure**

A file should be reviewed immediately on being closed by the business area. The long term value may be clear at this stage and staff should indicate their decision on the file's retention / disposal when it is being closed, if not already specified in the retention and disposal schedule.

#### **First Appraisal/Review**

Unless a specific retention period has been specified a file will be reviewed by PRONI five years after closure. Procedures shall be put in place to ensure that these records are reviewed at the appropriate stage.

#### **Second Appraisal/Review**

There may be occasions when it proves difficult to reach a decision on a file at first review. Such files may be put away for re-examination at a later stage by PRONI, no more than 20 years after the file was opened. If this is the case, systems shall be put in place to ensure that the second review by PRONI takes place.

## **Transfer to PRONI**

The records are transferred to the Public Record Office of Northern Ireland (PRONI) under warrant, where they will be preserved and securely held.

Records identified for Permanent Preservation in PRONI will normally transfer under warrant once they have reached 20 years old (as calculated from the date of the last paper). They are therefore considered to have become Historical Records (as defined within the Freedom of Information Act 2000, Part 6), and must be accompanied by clear FOIA access recommendations.

However, in line with the *Public Records Act (NI) 1923 (s.3(c))*, certain record classes may be designated by the Public Authority for 'early transfer', usually because the record class is open and the information is already available in the public domain. In rare circumstances (for example, if the creating organisation is facing imminent dissolution, or a Public Inquiry wishes to transfer the complete record urgently), PRONI can accept early transfer.

## **5. Destroy**

The records are disposed of securely and in line with council policies and procedures. The only exception to destruction is if the information is subject to an ongoing legal, audit or FOI case.

## **New/changed Functions**

As new functions or classes of records are created or changed during the life of the Schedule, and are not reflected in the current Schedule, advice must be taken from PRONI on whether there is a requirement for the Council to re-draft, and resubmit the Schedule to the NI Assembly.

## **Operation of this Retention and Disposal Schedule**

### **Closing a file**

In order for this retention and disposal schedule to operate effectively, it is important to maintain a streamlined filing system through regular and systematic closure of files. Closing a file does not mean that it has to be immediately removed from the filing system. What it does mean is that no additional papers should be added to the file and that it should be used only for reference.

When a file is due to be closed the appropriate member of staff should consult the retention and disposal schedule and indicate on the file the date on which it can be destroyed, transferred to the Public Record Office of Northern Ireland, or whether it should be subject to the normal review procedures. The form 'RECORD DISPOSAL FORM' should be completed and attached to the front of the file upon closure.

## **Retention Period**

Retention periods are based upon the specific business needs of the Council in addition to the regulatory environment within which the Council operates. The retention period required for each type of file is calculated from the point the file is closed. For example, if the retention period, as recorded on the Schedule is 5 years and the action is destroy, then a record closed on 10 October 2013 should be retained until 10 October 2018.

## **Destruction**

Destruction of files will take place on a planned basis in line with agreed procedures. All destruction decisions must be agreed by the relevant Head of Service or Director before destruction can take place. A record of all file destruction will be kept for audit purposes and all files will be destroyed in line with the arrangements for the destruction of confidential waste.

## **Roles and responsibilities**

The Chief Executive has overall responsibility for ensuring that the Council complies with the requirements of legislation affecting the management of records, and with any supporting regulations and codes.

### **Heads of Service are responsible for:**

- Ensuring that the Retention and Disposal Schedule, and associated procedures are fully observed and implemented within their area of responsibility;
- Ensuring that all staff within their area of responsibility receive the appropriate training.

### **All members of staff are responsible for:**

- Documenting their actions and decisions, and for maintaining the records in accordance with the Council's agreed policies and practices.

## **Legacy records**

Records created by predecessor bodies of the Council will be referred to PRONI for appraisal.
